

NATURANA

Business Sector - Manufacturing

Key facts of the installation

Number of Employees

30

Key Issue

By investing in Vanquish together with Magstripe swipe card terminals, Naturana is now able to accurately calculate the hours worked by its employees. Vanquish IPS also installed the Access Control module of the software to control a secure door. This helps to monitor staff comings and goings, as well as lunch and cigarette breaks. Staff at Naturana use the same card to enter the building as they do to clock in and out.

Products Supplied

- Magstripe Terminal
- Vanquish integrated to work seamlessly with the above hardware.

Functions

Benefits

- Precise calculations
- Easy to use for staff
- Personal record for each employee
- Improved security

“ I would most definitely recommend Vanquish IPS as I have found them to be extremely helpful and very professional at all times. The installation process ran very smoothly and since then the customer service has been second to none.”

SENIOR ACCOUNT MANAGER

CASE STUDY

Naturana

Naturana is one of the top 5 manufacturers of lingerie and ladies foundations in Europe with 30 million items produced each year and customers in over 50 countries. Their motto is “to offer long lasting quality products at affordable prices, along with exceptional service”. Their UK office is based in Lichfield, Staffordshire.

Customer Challenge

Accurate time and attendance is vital at Naturana because the administration department depends on accurate information for wage calculations.

Naturana previously used an old Blick system but this was proving insufficient in coping with the demands of the current working patterns. Naturana wanted to implement a new time and attendance solution that would accurately monitor employee working patterns. Not only that, Naturana sought to invest in an access control system to control a secure door. This would be used by the company to improve the health and safety of staff as they would be able to accurately identify which staff are on site at all times.

The Business Solution

Naturana replaced their existing time and attendance system with a newer and more efficient magstripe solution, capable of accurately recording the attendance of their staff.

The key selection criteria for purchasing a new magstripe solution were that the system was cost effective, reliable, efficient and easy to use on a day-to-day basis by the 30 employees at the company. By integrating the terminals with Vanquish, key personnel information such as contact details, holidays and sickness records can be stored in a central, easily accessible location. Naturana now has one person controlling the system and another person to cover holidays and staff absences.

Automation of the clocking via the magstripe terminals makes the initial time recording simple with no real chance of errors. Once the data has been reviewed, the records are stored centrally and are available to reassess whenever necessary. When it comes to handling the payroll, managers can quickly check each individual record to clarify the hours worked by each individual. As a result, employees can be confident that they will be paid for the hours they have worked.

Vanquish IPS also implemented the Access Control module on the software to control a secure door. This has not only improved the security and health and safety measures at the company but helps monitor staff comings and goings at lunch and break times, as staff use the same card to enter the building as they do to clock in and out.

Recommendation

“ I would most definitely recommend Vanquish IPS as I have found them to be extremely helpful and very professional at all times. The installation process ran very smoothly and since then the customer service has been second to none. ”
