

VF300

Product Description

VF300 is a new generation facial identification terminal, with Face, RFID & PIN Recognition mode. With the latest facial recognition algorithm and 200 face template capacity within group divisions, its verification time is still less than 1 second. All setting operations are easily done on 3.0 inches TFT touch screen. The elegant and small size design can fit with your office. With ZK Face identification system, your life will become more secure and convenient.

Functions

Standard

Optional

Features

- Elegant ergonomic design
- TCP/IP communication and USB Host
- 3.0 inch TFT touch screen, T9 Input, 9 Digit User ID
- Infra-red optical system enables user-identification in poorly lit environments
- Optional Mifare card module
- Professional facial identification algorithm

VF300 Specifications

Capacity

Face Capacity	200 (1:N)
ID Card Capacity	10,000

Hardware

Platform	ZEM810
Sensor	Special Image Stereo Dual Sensor

Display

Screen	TFT Screen 3.5 inch
--------	---------------------

Environment

Oper. Temp	0°C - 45°C
LED Indicator	20% - 80%

Power

Power	12V, DC, 1.5A
-------	---------------

Communication

Comm. Port	RS232/485, TCP/IP, USB Host
------------	-----------------------------

Face Algorithm

Type	ZK Face v7.0
Verification	<1 second

Dimensions

Dimensions	104.7x160x36 mm (L x W x D)
Weight	1.4Kg

Firmware

O.S	Linux
Applications	ZK Time
SDK	Standard SDK
